

Two roll mill HW-30

The mixing machine for bigger quantities silicone or HCR

HCR resins have to be mixed prior to be extruded in extruders. For reliable results of final curing of the product it is inevitable to mix resins prior to the extrusion process. We build mixers for the pre mixing process. Our HW-30 mixer can take up to 5 kG. Of 50 shore A resin at a batch. Bigger machines are only build to client specification.

Machines up to 2 kg. can be executed in single phase power supply, bigger quantity machines require 3 phase power supply.

Technical specifications:

Electrical connection: 400 Volt, 3 phase and ground.

Installed power rating: 2,2 kW

0 Volt safety

Standard workheight: 1,2 mtr

Roll width: 75 cm

Roll diameter: 20 cm

Thickness minimum/maximum: 0 - 15 mm

Rotation speed: variable 1 - 30 RPM

Machine weight: 420 kg

Dimensions: L x W x H : 1,2 x 0,85 x 1,45 mtr

Colouring:

The standard frame of this machine is powdercoated in RAL 5026 (dark blue metallic).

Plating of the machine is powdercoated in RAL 9001.

The machines can be delivered in any color of your own preference (additional charge).
